

CONVERTER BOX

INTERFACE TO CONNECT SALT SYSTEMS WITH A CONTROLLER

The CONVERTER BOX “plug & play” allows to connect several salt systems with a controller. It isolates the control signals between several salt chlorine generators and a PPM and pH/ORP controller.

The “Master” interface can control up to 5 cells. By adding a “Slave” CONVERTER BOX, connected with the extension cable CBL5EXT, you can control 5 additional cells.

A maximum of 9 interfaces "Slave" CONVERTER BOXES can be controlled by a "Master" (a maximum of 50 cells in total).

CONVERTER BOX models are available for HAYWARD, PENTAIR AND JANDY salt chlorine generators.

The CONVERTER BOX includes:

- 1 Interface that can control up to 5 chlorine generators
- 5 Connecting cables (CBLJT) for salt system
- 1 Power bloc 110V (AL12DC)
- 6 Setting jumper
