

# COVER CONVERTER

## INTERFACE FOR POOL AND SPA AUTOMATED COVER

The **COVER CONVERTER** is the ideal solution to control chlorine generators at the opening and closing of the automated cover your pool. With a sensing contact on the cover system, that interface manage the chlorine production of your chlorine generator and the external input on your automation system to drive some options (pump, waterfall, vanishing, etc...).

It is compatible with all automation systems (HAYWARD, PENTAIR AND JANDY) and all salt chlorinators.

The Cover Converter kit includes :

- 1 x Cover Converter Interface (up to 5 chlorine generators)
- 1 x Waterproof magnetic Contact
- 1 x power supply 110V
- 2 x special Wiring (to connect the cover converter to the automation system)
